

ASX Watchlist Catch Up

Daily Announcements Briefing, 29 July 2026

INTERNAL USE ONLY

This briefing covers confirmed ASX announcements across Discovery's 91 ticker watchlist for the 24 hours to 08:00 AWST on 29 July 2026.

Every item is traced to a dated primary announcement retrieved from the ASX announcements platform, and the text of each material announcement was read in full. News coverage of older announcements is excluded.

Confirmed Announcements

Three of the 91 issuers on the watchlist lodged a material announcement in the 24 hours to 08:00 AWST on 29 July 2026. Pacgold (ASX: PGO) is halted pending an announcement regarding a capital raising, with trading to resume on the earlier of normal trading on Friday 31 July 2026 or the release of that announcement. The halt follows Pacgold's White Dam North discovery, which returned 20m @ 2.5g/t Au and 0.5% Cu from 58m (WNRC006). Northern Star (ASX: NST) revised FY26 guidance to 1.65Moz and declared a maiden 8.5Moz ore reserve at Hemi inside a quarterly report that was not flagged price sensitive.

Ticker	Company	Announcement	Type	Date
PGO	Pacgold Limited	Halt pending capital raising, resumes 31 Jul	Halt	29 July 2026
NST	Northern Star Resources	FY26 guidance 1.65Moz, Hemi reserve 8.5Moz	Guidance	29 July 2026
CMM	Capricorn Metals	Investor presentation, document not readable	Presentation	29 July 2026

Document keys and lodgement times: PGO 2924-03115269-3A697795 (07:32 AWST); NST 2924-03115901-3A697822 (09:14 AWST); CMM 2924-03115444-3A697801 (11:00 AWST); GBR 2924-03115120-3A697770 (10:02 AWST); NST KNST (09:30 AWST); RMS KRMS (09:30 AWST); WAF KWAf (09:30 AWST); ODY KODY (09:30 AWST)

Watch items

- Pacgold (ASX: PGO): halted pending a capital raising announcement. Resolution expected on the earlier of the announcement or normal trading on Friday 31 July 2026. Terms, size and pricing are not yet disclosed.
- Pacgold assays outstanding on eight of ten RC holes at White Dam North, including 59m of visible sulphide in WNRC007.

Unconfirmed

- Capricorn Metals (ASX: CMM): an investor presentation lodged at 11:00 AWST could not be parsed, most likely a scanned image. It is listed here rather than omitted. Recommend opening document 2924-03115444-3A697801 manually.

Announcement Detail

PGO: Halted pending a capital raising, days after a high-grade discovery

Pacgold requested a trading halt at 07:32 AWST pending an announcement in relation to a capital raising. The halt runs until the earlier of normal trading on Friday 31 July 2026 or the release of that announcement. The timing follows the 23 July White Dam North result, where WNRC006 returned 20m @ 2.5g/t Au and 0.5% Cu from 58m, including 6m @ 7.5g/t Au and 1.2% Cu from 68m and 3m @ 12.5g/t Au and 1.8% Cu from 68m. WNRC010 returned 10m @ 3.4g/t Au and 0.7% Cu from 54m. Eight of ten RC holes intersected visible copper sulphides with assays still pending, so the announced result is not the full picture. The project sits 80km east of Broken Hill in the Olary Province, South Australia.

NST: Guidance revision and a maiden Hemi reserve, inside a routine quarterly

Northern Star revised FY26 production guidance to 1.65Moz at an AISC of A\$2,150/oz, and declared a maiden ore reserve of 8.5Moz at Hemi. Neither figure was flagged as price sensitive and both sit inside a document headlined only as a quarterly activities report, which is the reason this briefing reads announcement text rather than headlines.

Quarterlies

Quarterly activities and cash flow reports lodged in the window, with production, costs and cash position.

- **NST (\$29B):** Northern Star sold 433koz gold at AISC \$2.7k/oz, lifted cash and bullion to \$1.2B (+\$52m QoQ), and began commissioning Stage 1 of the KCGM Mill Expansion for a September tie-in
- **RMS (\$5.7B):** Ramelius closed the June quarter with \$650m cash and gold (+\$43.1m QoQ) after producing 53.5koz gold at AISC of \$2k/oz
- **WAF (\$3.2B):** West African produced 125koz gold at AISC US\$1,730/oz, cash plus bullion +US\$46m QoQ to US\$777m; FY26 guidance maintained
- **ODY (\$44m):** Odyssey's Tuckanarra scoping study outlines 79koz gold over 29 months at \$3.4k/oz with \$7m capex, and a 2027 Kirkalocka toll-milling agreement has been executed

Coverage Notes

A capital raising halt at Pacgold follows its White Dam discovery, and Northern Star's reserve sits inside a routine quarterly.

No dated announcement was found inside the window for the remaining 84 names:

AQI, ARV, AS1, BM1, BNZ, GBM, GG8, GHM, GML, GSN, JAV, KAL, LCL, LEX, OZM, SLS, STK, TOK, TOR, TTM, YRL, MPK, NVO, AAM, GA8, MBK, NWM, SMS, SKM, CZN, ARI, VAL, PC2, AAR, LAC, AUC, AUE, AZY, BGD, WAU, CAV, GPR, HRN, MRT, KZR, LGM, MAT, MI6, MM8, NXM, PDI, PTN, RXL, SMI, STM, STN, TAM, TCG, TRE, TSO, WGR, WIA, MEK, PRX, PGL, EVN, BGL, BC8, BTR, CYL, EMR, GGP, GMD, KCN, NMG, OBM, PNR, PRU, RRL, RSG, SBM, VAU, WGX, ORE

Method

- Every ticker on the watchlist was checked against the ASX announcements feed for an explicit lodgement timestamp inside the window. The feed is the exchange's own, so coverage does not depend on a search engine surfacing the item.
- Materiality was assessed on the text of each announcement, not its headline, so that a routine-sounding title cannot conceal a resource estimate, a guidance change or a transaction.
- Halts and price-sensitive announcements were opened and read for their stated reason and headline figures. This is true of every item reported.
- All dates are AWST, computed as UTC+8 from the exchange's own timestamp.
- Documents that could not be read are named in Unconfirmed rather than omitted. 1 could not be parsed on this run.

Day in Brief

Pacgold (ASX: PGO) is the live situation. The company is halted pending an announcement in relation to a capital raising, with trading to resume on the earlier of that announcement or normal trading on Friday 31 July 2026. The halt comes six days after the White Dam North discovery, where WNRC006 returned 20m @ 2.5g/t Au and 0.5% Cu from 58m, including 3m @ 12.5g/t Au and 1.8% Cu, and with assays still pending on eight of ten holes. A raise priced off an incomplete assay picture is worth watching.

Separately, Northern Star's FY26 guidance revision to 1.65Moz and its maiden 8.5Moz Hemi reserve arrived inside a document headlined as a routine quarterly and carrying no price-sensitive flag.

Additional Information and Contacts

This briefing is an internal working document prepared for the Discovery team. Questions on coverage, sources or method should be directed to one of the representatives of Discovery below.

Under no circumstances should any company referenced or any of its affiliates, customers, suppliers or regulators be contacted directly.
